

April 24, 2017

The following was sent to KYAE listserv.

Register Now - April 25 Tuesdays for Teachers Webinar

Please see the below learning opportunity, which is occurring tomorrow. *(It is not required and does not meet PD requirements.)*

Be sure to join us for our next *Tuesdays for Teachers* webinar! Take a deeper dive into strategies and techniques to use in the classroom to help your students pass the GED® test in this upcoming webinar

[Mathematical Reasoning: What's the Problem with Inequalities?](#)

Tuesday, April 25th, 2017
3:30 - 5:00 PM ET / 2:30 - 4:00 PM CT

It seems fairly simple: $3 < 7$ or $4x \geq 12$. Students just need to compare the numbers and determine if the statement is true or not. Surely, if students can solve basic equations, then working with inequalities shouldn't be a big deal. However, students do struggle with inequalities and the reasons for that struggle range from a lack of conceptual understanding to the inability to apply what they already know in real-world situations.

Join the GEDTS professional development team as they explore inequalities in real-world situations. From math practices, online resources, and professional development opportunities for you to explore, this webinar will provide you with ideas for teaching the basics of inequalities in your GED® Prep Math classroom.
